PROBLEM STATEMENT

Managing hostel activities manually is difficult and time-consuming

Records of students, rooms, and fees are not properly maintained

High chances of data loss and errors in manual systems

Hard to track room availability and handle complaints efficiently

OBJECTIVES

01

Create a digital hostel management system

02

Store student and room details efficiently

03

Reduce manual work and errors

04

Provide easy and secure access to information

05

Manage fees and complaints properly

EXISTING SYSTEM

✗ *What's Wrong Today*

✗ Uses manual registers or files — highly error-prone

✗ Data is not organized properly — impossible to query

✗ Difficult to search student or room details quickly

✗ Takes more time and effort for routine tasks

✗ No proper system for complaint handling

PROPOSED SYSTEM

Computerized System

A full web-based software solution for hostel management

Database Storage

All records stored securely — easy to add, update, and delete

Quick Access

Instant access to student, room, and fee details

Complaint System

Built-in complaint management and tracking module

SYSTEM ARCHITECTURE

PRESENTATION LAYER

Student / Warden UI — HTML, CSS, JavaScript

APPLICATION LAYER

Business Logic — Server Side Processing

DATA LAYER

Database / Storage — MySQL / MongoDB

DATA FLOW

User / Admin Login

System Processes Request

Database Query / Update

Output Displayed

DATA FLOW DIAGRAM (DFD)

ER DIAGRAM

SYSTEM MODULES

Student Module

01

Registration, profile management, room requests, fee viewing

Room Management

02

Room allocation, availability tracking, room type management

Fee Management

03

Fee calculation, payment tracking, dues and receipts

Complaint Module

04

Submit, track, and resolve hostel complaints

Admin Module

05

Dashboard, user management, reports, and system settings

Reports Module

06

Generate reports for students, rooms, fees, and complaints

IMPLEMENTATION — PROJECT DEMO

TECHNOLOGY STACK

Frontend: HTML5 / CSS3 / JavaScript

KEY SCREENS

Login Page

Secure admin/student login

Dashboard

Overview of all hostel stats

Room Booking

Browse & book available rooms

Fee Portal

Pay and track hostel fees

CONCLUSION

The system successfully digitizes all hostel management operations

Manual work and errors are significantly reduced

Provides fast and accurate access to student, room, and fee information

Complaint management is streamlined and trackable

Overall hostel efficiency and organization is greatly improved

FUTURE ENHANCEMENTS

Mobile App

Dedicated Android/iOS app for students and wardens

AI Chatbot

AI-powered chatbot for complaint resolution and FAQs

Online Payments

Integration with payment gateways (Razorpay, UPI)

Smart Alerts

Auto SMS/Email notifications for fees, maintenance

Analytics Dashboard

Advanced analytics and reporting for hostel admin

Biometric Auth

Fingerprint/face recognition for student check-in/out
